

nexGen

As your machines become older so does the technology used to control the machine.

Introducing the NexGen program for LVD PPEB and Easy-Form® press brakes – a control and safety system upgrade that brings your machine into the smart manufacturing age and extends the life of your investment.

MANAGE YOUR RISK

- Can spare parts for your machine still be sourced?
- Could you afford any downtime?
- What's the risk of not retrofitting your machine?

INDUSTRY 4.0 COMPATIBLE

- Meet the challenge of the 'Small batch – Short lead-time' modern day manufacturing culture.
- Fully 'Smart Industry' compatible.
- Enables the centralisation and analysis of big data for efficient production management.

UP TO 50% INCREASED THROUGHPUT*

- Faster and more intuitive input into the Touch-B controller.
- Visualise more complex parts through 3D simulation graphics.
- Programming offline with CADMAN-B software maximises productivity.

*subject to the age of the machine and controller version.

SAFETY AND SERVICE

- Are you compliant to the latest safety standards?
- Is safety compliance reducing your productivity?
- Make your machine more serviceable for the future.
- Enable remote diagnosis by LVD's teleservice.

For more information contact your local LVD service which can be found on our website www.lvdgroup.com under 'contact'.
