

MOVit

LA 3015 & 4020

EASY LOADING AND UNLOADING

The MOVit Load-Assist automation (LA) offers two systems to increase laser cutting productivity.

LA Operator Load automatically transfers unprocessed sheets quickly and efficiently to the cutting machine shuttle table.

LA Automatic Load/Unload automatically loads material and, during unmanned production, unloads cut sheets to an unloading station or a conveyor.

MACHINE SPECIFICATIONS	LA 3015	LA 4020
Maximum sheet dimensions	120" x 60" x .250" (3070 x 1540 x 20 mm)	161" x 80" x 0.5" (4090 x 2055 x 12.7 mm)
Minimum sheet dimensions	36" x 36" x 0.039" (1000 x 1000 x 1 mm)	36" x 36" x 0.039" (1000 x 1000 x 1 mm)
Maximum sheet weight	1980 lbs (900 kg)	1807 lbs (820 kg)
Height of the system	109" (2780 mm)	109" (2780 mm)

Specifications subject to change without prior notice.

MOVit RANGE

MOVit is a comprehensive range of automation systems that includes TAS (Tower Automation System) and WAS (Warehouse Automation System) as well as Compact Tower, Flexible Automation and Load-Assist.

Automation benefits:

- Continuous production for lights-out manufacturing
- Fully automatic loading and unloading during cutting
- Efficient handling of workpieces
- Highly reliable automated production
